

SIEMENS

„The Power to Go Anywhere“

- 36 watts of clean, quiet solar power
- Reliable 12-volt battery charger
- 5-year limited warranty

RV Power Kit

SOLAR BATTERY CHARGER

Clean. Quiet. Natural.

Enjoy all the benefits of solar power and the freedom of an easy-to-install, simple-to-use RV Power Kit from Siemens Solar—the world's largest manufacturer of solar energy panels.

How does it work?

No advanced degree required. The science of the RV Power Kit is really simple: **the more sunlight the solar panel can absorb, the more power your system can provide.** The Siemens solar panel is highly efficient and produces electricity in as little as 10% of full sunlight. Whenever the sun shines on the panel, electricity is produced and fed into your vehicle's storage battery.

What can be powered?

The 36 watt RV Power Kit unit will generate approximately **8 amp-hours per day** under standard operating conditions (or, just 4 hours of full sunlight for a unit fixed in a horizontal position on the roof of your vehicle.)* That's power for small appliances, like an AM/FM radio, a ventilation fan, fluorescent lights, or a small TV set. And you can use the unit as a trickle-charge insurance policy, to keep your storage batteries topped-up.

Is this a reliable power system ?

Yes. The RV Power Kit is designed and manufactured by Siemens Solar, uniformly regarded as **the world leader in solar power generation.** Siemens Solar is an ISO 9001-certified manufacturer and stands behind its RV Power Kits with a 5-year limited warranty.

Is this a complete power system?

The RV Power Kit provides you with **everything you need** to assemble your own efficient, reliable solar power system, and begin generating electricity. The heart of the kit is the 36 watt high efficiency solar panel which converts sunlight into DC current. A charge controller keeps your batteries fully charged, and at the same time, protects them from overcharging. Both the panel and the controllers are tested and approved by Underwriters Laboratories (UL). The complete RV Power Kit includes all the hardware and information you need for trouble-free mounting and wiring. Just add sunlight.

All Siemens RV Power Kits are backed with a 5-year limited warranty.

Made in U.S.A.
